

Produced from extra strength tempered steel, XCH gullet plates are made to fit your XCH saddle.

Use the XCH measuring device to find the correct sized gullet plate for your horse.

How to change your GFS XCH Gullet Plate

1

Unscrew the TOP two screws on either side of the saddle, located underneath the skirt.

2

Removing the two TOP screws will release the panel from the front of the tree.

3

Free the leather strip covering the gullet plate.

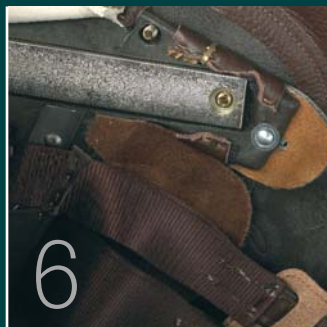

4

Pull the leather strip forward to reveal the gullet plate.

5

Unscrew the BOTTOM two screws on either side of the saddle, located underneath the skirt.

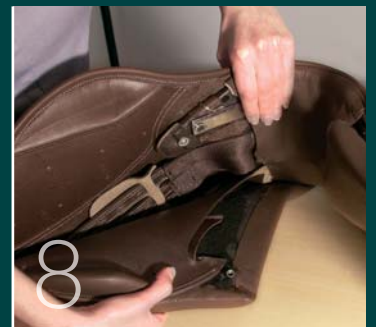

6

Removing the two bottom screws will release the gullet plate from the tree

7

Fit the gullet plate required. Re-attach the leather strip covering the gullet plate.

8

To finish, slot the tree points back into their pockets and the panel back in place. Tighten up the screws to secure the saddle.
